

June 22, 2018

Dear Stakeholder,

**Resurfacing Work**

Paving has been completed on the east side from 1800 North to 3100 North. Milling and paving operations will continue north starting Sunday, June 24. During paving operations, the project team is asking business owners not water the grass areas along Main Street for 48 hours prior to paving work being performed at your location. The project team will notify businesses in advance. If you would like assistance turning your sprinklers off, please contact us, provide your information, and the construction contractor will do it for you.

**1600 North Intersection**

Work on pedestrian accesses continues and should be completed within the next two weeks. The intersection of 1600 North and Main Street is scheduled to be closed the week of June 24. Additional information will be provided as it becomes available.

**3100 North Area**

Crews are finishing the underground work connecting all the electrical and communication lines for the new signal. The signal will be activated once the resurfacing work on US 91 is complete and the lane markings are placed on the roadway.

Motorists should expect narrowed lanes and moderate travel delays. Access to area businesses will remain open during the day. This work will continue through July 2018. Contact the project hotline, 877-495-4240 or email [us91logan@utah.gov](mailto:us91logan@utah.gov) for more information.

Best,

Breanne Harris
